

Ready made Shelf company

WHY BUY A SHELF COMPANY IN
SERBIA?

Need to start a new business in Serbia? The most efficient and secure way is to acquire a Shelf company!

Shelf company in Serbia

A SHELF COMPANY IN SERBIA

Shelf company is a registered company which has been as we like to say “put on a shelf” where it is left dormant for some period of time. It was formed and incorporated by our legal experts, and then deliberately left dormant, without any, or without any significant activity. These companies are without any assets, inventory, obligations, credit or tax payer history.

They are registered on Serbian nationals who are owners and CEOs of those companies.

Companies have opened and fully functional one or multiple bank accounts, and functional online and e-bank solutions, ready to use!

3 reasons why you should buy a **ready made company**

Discover the benefits of acquiring a ready
made company in Serbia

3 reasons why you should buy a ready made company

1. IT IS FAIRLY INEXPENSIVE TO START.

The fully established, incorporated legitimate business in Serbia, with registered beneficiary owners, functional bank account, online banking, and all other start up procedures finished is cheap in terms of the costs you can have trying to establish a completely new company. If your **time is money**, and we believe it is, the amount that you are going to spend is actually much more than the sheer price of services that you pay for. With banking regulations getting more and more strict in Serbia, the registration and opening a new, foreign-owned business can be a tricky and time consuming activity. With some new major developments in main Serbian banks, the whole procedure of registration of new company can sometimes last more than a month or two, **even with a possibility of refusal**, with painstaking questionnaires and necessary filings to the banks, and repeated need for your physical presence in Serbia.

2. TRUSTED PARTNERS

Obtaining the shelf company which was registered and established by our legal and accounting team, is completely risk free!

Our company **guarantees** that the company was newly formed, put dormant immediately upon registration, without any dues or obligations towards any government or other body or authority, or third person.

3. CAN BE OPERATIVE IN MATTER OF 2 DAYS

After selecting the proper company with adequate code of activity, only one visit to notaries office is necessary for you to be the legal owner of the shelf company. We do this by scheduling the visit a couple of days before, thus saving your time and money.

After this, you make a short visit to the banks in which the company had already opened and active accounts in, and this procedure is obligatory, for the reasons of change in the company ownership and responsible persons. Our team accompanies you in all of these steps, and translation, English or Russian is secured!

Full support in all phases
